

Prioritization Process Pilot

Task 7440

Purpose: To develop a transparent prioritization process that accounts for lifecycle cost accounting, multidisciplinary benefits, and future uncertainty building on the Pathways to the Future scenario planning process

Guiding Plans

- Pathways to the Future
- Transportation Improvement Program
- Regional Funding Framework

Deliverables

- Develop detailed methodology for project evaluation including lifecycle costs and monetized benefits and disbenefits **(Sept 2026)**
- Refine and process data needed to implement methodology **(April 2027)**
- Create tools for benefit and burden calculations, including updated travel demand model and investment strategy modeling **(Sept 2027)**
- Develop new or refine existing website to present project scoring and ROI information clearly and transparently to the public **(Sept 2027)**
- Update regional project selection framework to incorporate the refined approach **(Sept 2027)**
- Conduct Literature Review including review of best practices with peer MPOs and challenges with local partners and the public **(Sept 2026)**
