4. CVTA Regional Projects Cycle – Round 3

(60 minutes)

Action from CVTA Finance Committee:

CVTA Technical Advisory Committee should meet to discuss the development of an additional draft funding scenario for consideration by the full authority. That consideration should include the following:

- a. Include an additional year of programming funds, which would align this round with the programming year of Smart Scale Round 6, through FY31
- b. Include the use of reserves that CVTA staff have set aside as a potential working capital reserve. This amount is equal to roughly 3 months of expected regional fund revenue and is intended to do the following:
 - I. Help achieve financial stability and flexibility and to provide cushion against unexpected events that could impact cash flow.
 - II. This reserve is different from the framework programming methodology that sets aside a targeted percentage of allocations to cover cost increases and allow for project selection in the future. PFM's opinion is that the framework component is more of a planning and programming guidance than a reserve.

- III. The working capital reserve can be built back up with expected regional revenue and the guidance suggests for that time period not to exceed 18 months.
- c. In addition to cost-benefit being used as a criteria for projects selection, TAC should also consider:
 - I. Regional benefit
 - II. Adjusted funding requests
 - III. Project readiness
 - IV. Leveraging opportunity
 - V. Other localities support
