now incorporating  
input into final plan

## Long Range Transportation Plan (LRTP) - future needs. Investment Scenario Rating

through April 17, 2026

## Recycling Barriers Study w/ CVWMA

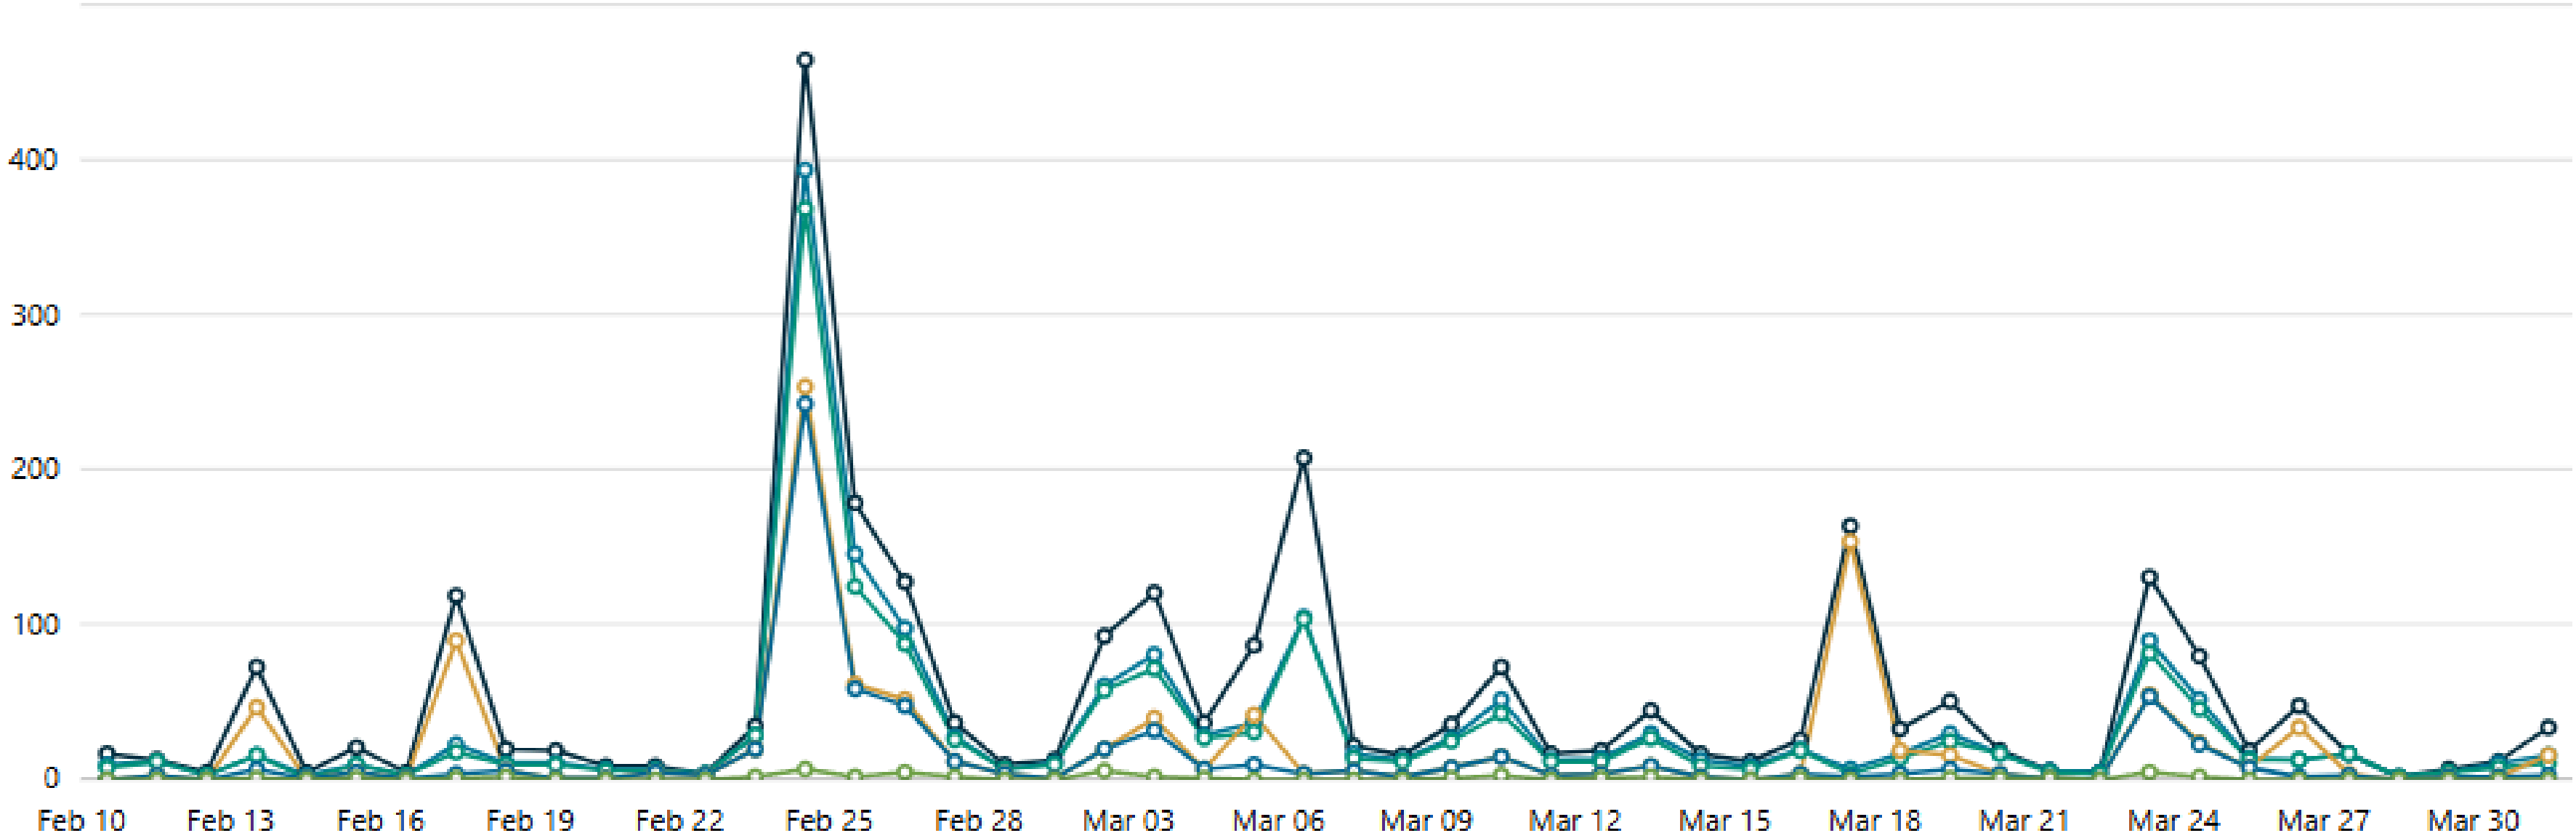

study design - now  
engagement - summer

## Weaver Awards

building partnerships - now  
applications open - June

# Transportation Safety Plan

## Performance Summary

Views Visits Visitors Contributions Contributors Followers

# Transportation Safety Plan

Drivers making turns and **not stopping** for pedestrians

They are **not paying attention** to the roads

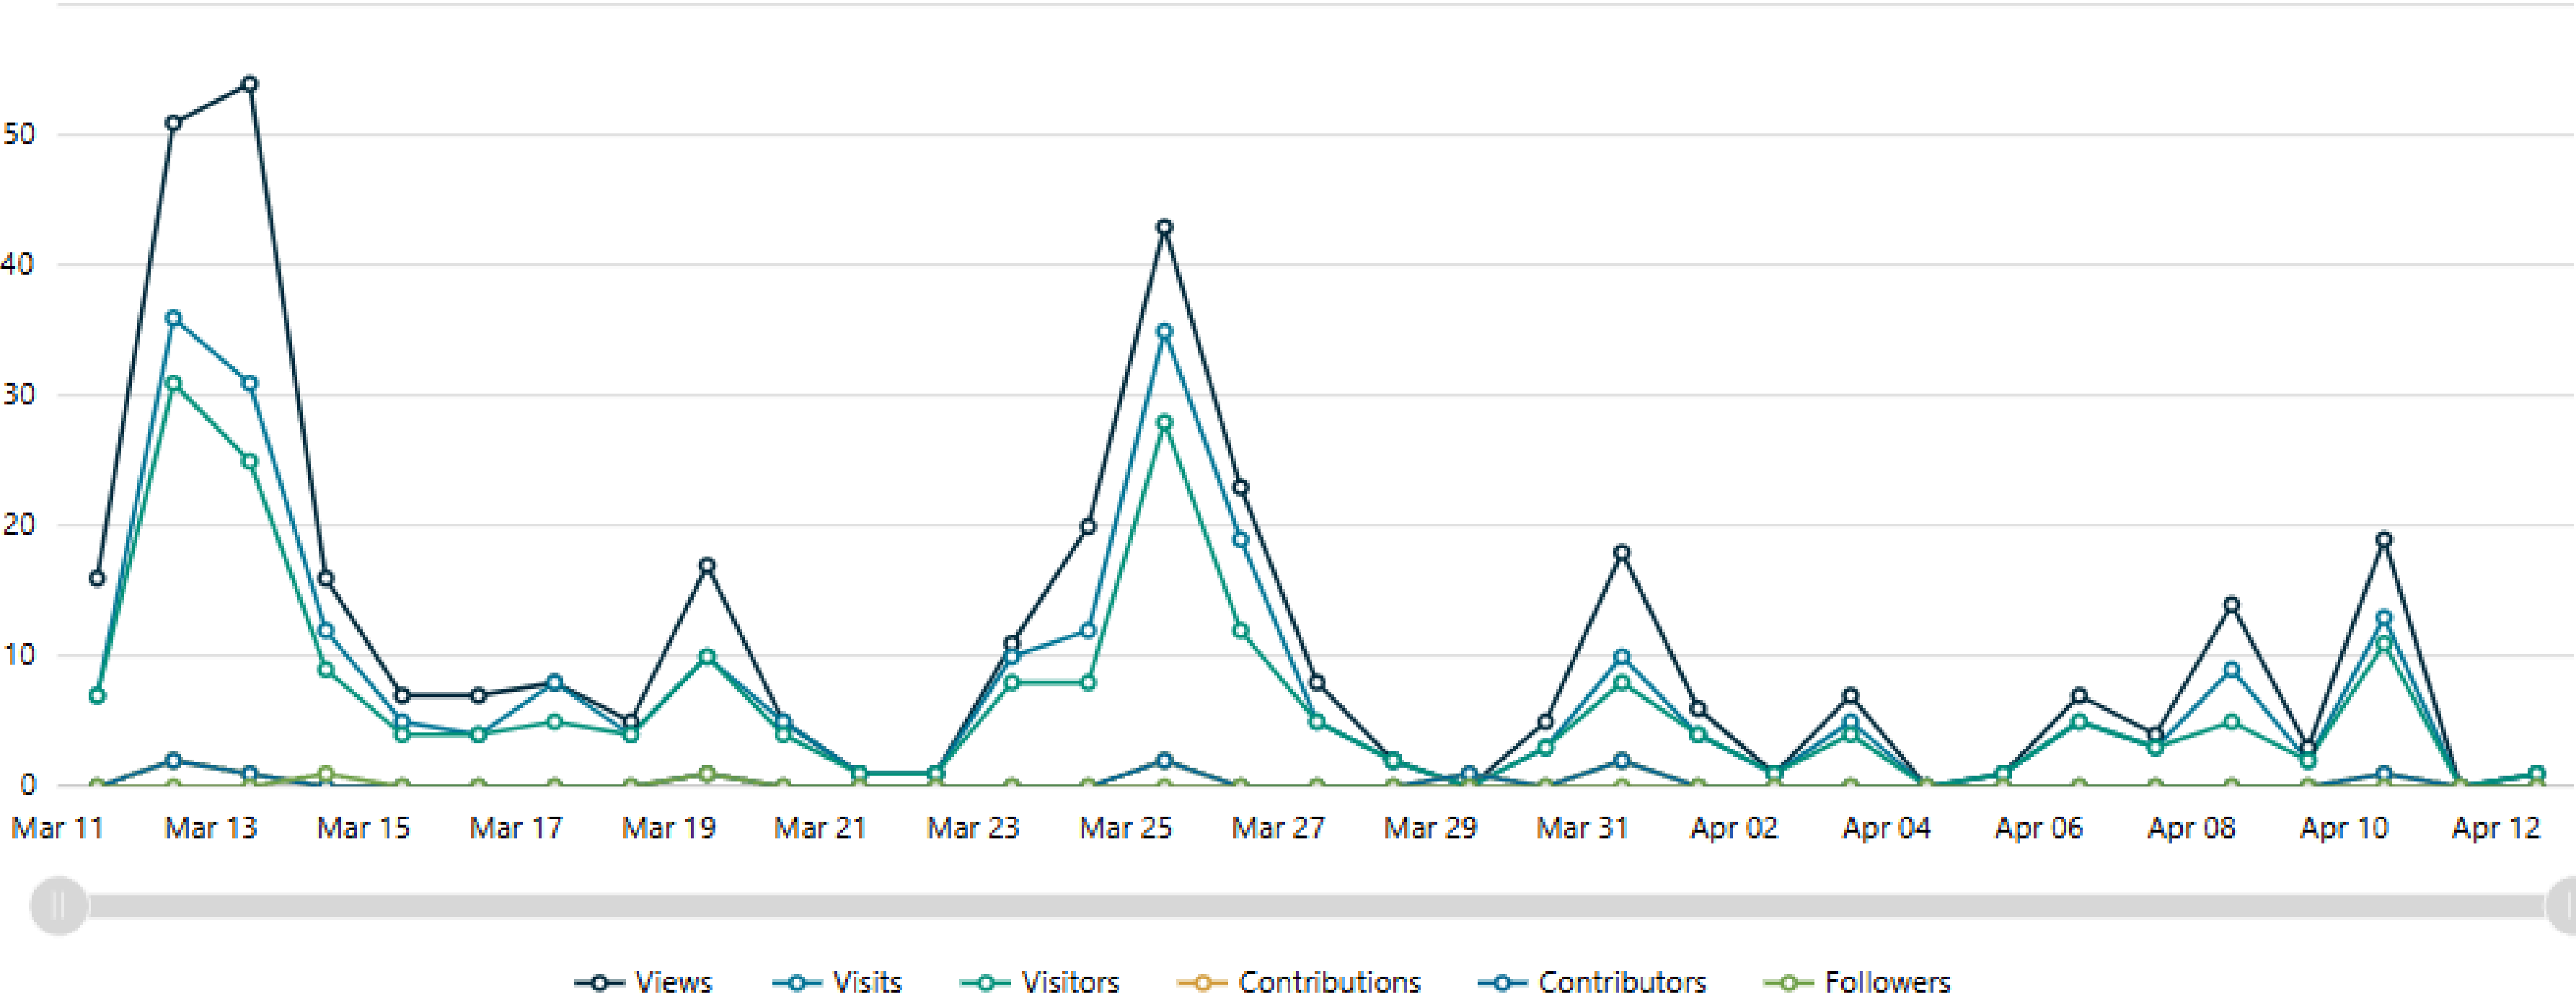

## *Biggest transportation safety concerns?*

There **isn't** a strong culture of cars **stopping to yield** to pedestrians. On multi-lane roads, even if someone in one lane tries to stop, it's **dangerous for pedestrians to cross** because **traffic** in the other lane often **doesn't stop**.

**high speed** in residential and high pedestrian areas

# Transportation Improvement Program (TIP)

## Performance Summary

# Transportation Improvement Program (TIP)

I am **excited** about the improvements to the **GRTC transfer** station.

Excited about investments in **Active Transportation** and Transit, specifically the **Pulse BRT** expansion and **Fall Line** Trail segments.

**Disappointed** that so much **money** is being spent to **fix bad decisions (Short Pump)**...Localities have **no incentive** to build **differently** or more **sustainably** if they keep getting funding to build the same old way.

I encourage the MPO to **move beyond 'conformity'** and strive for 'leadership' by setting more **aggressive** targets for **reducing greenhouse gas emissions**. More frequent **monitoring** of how TIP projects specifically **contribute** to **lower CO2** outputs.
