RECONNECT GRANT 2022

MCEACHIN

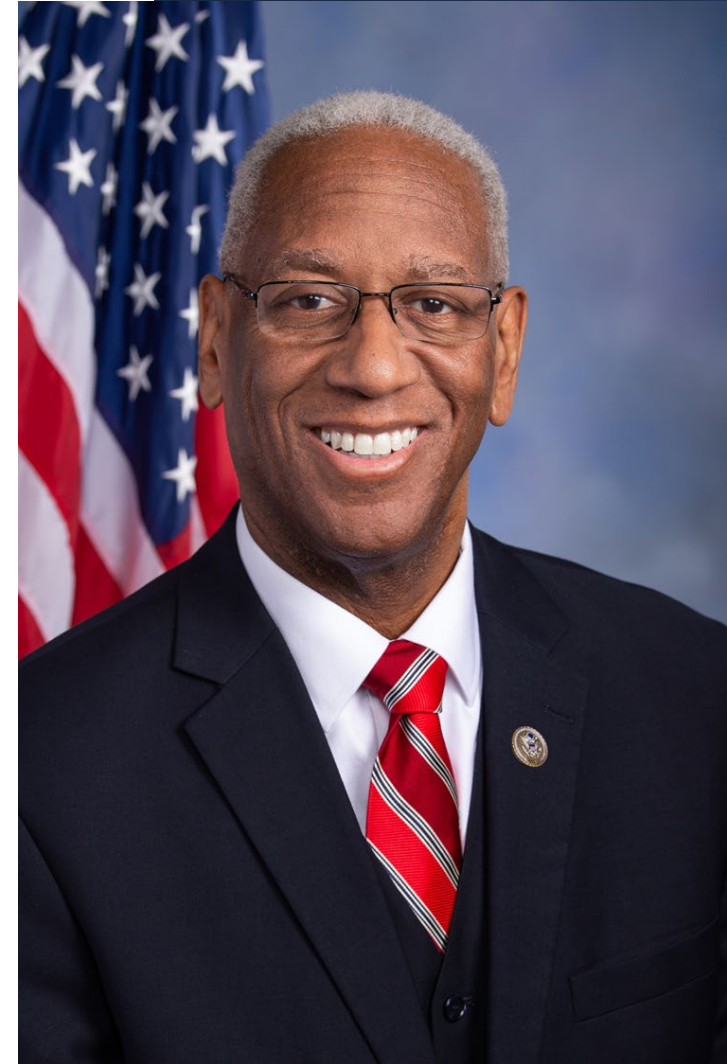

\$2,643,508

Roxbury Road/State Route 106 Water/ Sewer Infrastructure \$8,000,000

This project will support existing and anticipated future growth in Charles City County given that estimated future average daily water demand exceed will exceed the current permitted capacity of the Roxbury Industrial Park Water System. To increase the capacity of the water system a Preliminary Engineering Report prepared for the study area recommends that the County construct a new water main. The main will connect to an existing main that currently terminates at the Love's Travel Stop on Route 106.

The project will extend water and sewer infrastructure along Roxbury Road/State Route 106 along a trajectory from Charles City Road, State Route 600 to John Tyler Memorial Highway, State Route F, approximately ten miles, bringing sewage generated along the Roxbury Corridor to the existing Roxbury Wastewater Plant which will be expanded to accommodate additional flow.
