Chesterfield Countywide Sidewalk Implementation Plan

PlanRVA Active Transportation Working Group

September 8, 2020

Thomas Ruff, PE, PTOE
Thomas.Ruff@Timmons.com
804-200-6430
Project Goals

✓ Update Existing Sidewalk Data for all major roads / non-neighborhood

✓ Create a Countywide Sidewalk Masterplan

✓ Deliver a top Prioritized Implementation Plan with recommended improvement and budget estimate
Project Tasks

1. GIS Data Validation and Update
2. Demographic Data Enrichment
3. Data Publication and Map Product Creation
4. Meetings
5. Data Synthesis and Engineering Analysis
6. Technical Memorandum
Task 1: GIS Data Validation and Update

• Validate existing GIS sidewalk data and update inventory using available Google imagery

• Utilize VDOT Roadway Surface Condition Inventory to capture sidewalk locations on arterials/collectors
Task 2: Demographic Data Enrichment

- Demographics analysis to identify the census block groups that are highest in “need” of sidewalks and mobility for their population.
  - 168 Census Block Groups (CBGs)

- Proximity analysis for each potential sidewalk project and measures distance to attractors (schools/services/transit/jobs) and detractors (pedestrian crashes/speeds/ADT).
Task 2: CDC Social Vulnerability Index

• Utilizes 17 total demographic data points to rank order at-risk communities.

• Incorporated to provide comparison and facilitate creation of Chesterfield County Demographic Model
Task 2: Chesterfield County Demographic Model

• 2013-2017 ACS Owner/Renter HHs by Vehicles Available: 1 or 0
• 2013-2017 ACS Workers Walking to Work
• 2013-2017 ACS Workers Biking to Work
• 2013-2017 ACS Workers Transit to Work
• 2019 Population Density
• 2019 Employed Population (16+)
• 2019 Median Household Income
• 2019 Low-Moderate Income (LMI)
Task 2: Chesterfield Pedestrian Priority Model

- Created using three (3) basic components:

  1. Pedestrian Generators (Demographic Model)
  2. Pedestrian Attractors (Proximity Analysis)
  3. Pedestrian Detractors (Proximity Analysis)

- Origin – Demographics
- Destination – Proximity
**Task 2: Chesterfield Pedestrian Priority Model**

</table>
Task 3: Data Publication and Map Product Creation

- Creation of ArcGIS Online Database
- Includes Existing/Proposed & Ranked Sidewalk Segments
- Displays all data in one location for County staff to share and plan
Task 3: Data Publication and Map Product Creation

US Route 360 – Brad McNeer Parkway to Commonwealth Center Parkway (EB)  Overall Project Score: 30.97

Overall Project Rank: B
Project Length: 1,254 Linear Feet
Project Build Type: E_Shared_Use_Path
Build Type Rate/Linear Foot: $200
Estimated Budget: $370,000

Generator Score: 6.97
- Demographic Ranking: 58 of 168
- Adjacent Functional Classification: Principal Arterial
- Magisterial District: MATOACA

Attractor Score: 9
- Businesses within 1/2 mi: 54
- Schools within 1/2 mi: 0
- GRTC stops within 1/2 mi: 1
- All other POI within 1/2 mi: 0

Detractor Score: 15
- Adjacent Speed Limit: 45
- Adjacent Average Daily Traffic (ADT): 76,000
- Pedestrian involved crashes within 1/16 mi: 3

Timmons Group
Your Vision Achieved Through CLINC
Task 4: Meetings

• Define Methodology
• Refine Results
• Re-run and fine-tune priorities

• Coordination with Planning, Economic Development, Schools
Task 5: Data Synthesis and Engineering Analysis

• Missing Link Analysis to ensure all existing/proposed sidewalks were connected to another existing/proposed sidewalk

• Provide expertise to understand best location for placement of sidewalk along certain corridors

• Provide typical section and cost estimate assumptions for all recommended sidewalk segments
Task 6: Technical Memorandum / Project Results

- Countywide Sidewalk Masterplan
  - 2,000+ recommended sidewalk projects

- Rank Order of All 2,000+ Sidewalk Projects

- Overall Top 50 Recommended Sidewalk Projects
  - Top Recommendations by Sidewalk Type and Magisterial District
Next Steps

• Feasibility at Higher Level

• Replication for Other Localities

• Additional Assets
