Improve intersection at Parham Road and Patterson Avenue

This project will improve the intersection of two heavily traveled roads, Parham Road and Patterson Avenue (Route 6) in Henrico County, to accommodate the high volume of vehicles travelling these two corridors.

Dual left-turn lanes will be installed on Patterson Avenue’s eastbound and westbound approaches to the intersection, as well as on Parham Road’s northbound approach. Additional improvements include grass medians and a reduced-access point at the median on Paterson Avenue’s eastbound approach. These improvements will facilitate increased movement through the intersection, while also making the intersection safer.

Project Phase		Schedule	Estimate
Preliminary Engineering (PE)		Completed	\$1,700,000
Right of Way (RW)		Underway	\$3,590,241
Construction (CN)		FY21	\$6,592,685
Regional Funding from RRTPO
