Transportation Improvement Program

FFY 2024 - FFY 2027

Notices and Disclaimers

Title VI Notice

RRTPO and PlanRVA fully comply with Title VI of the Civil Rights Act of 1964 and related statutes and regulations in all programs and activities. The RRTPO and PlanRVA will strive to provide reasonable accommodations and services for persons who require special assistance to participate in this public involvement opportunity. For more information on meeting accessibility, or to obtain a Title VI Complaint Form, see PlanRVA.org or call the Title VI Coordinator at (804) 323-2033

Aviso del Título VI

RRTPO y PlanRVA cumplen completamente con el Título VI de la Ley de Derechos Civiles de 1964 y los estatutos y reglamentos relacionados en todos los programas y actividades. La RRTPO y el PlanRVA se esforzarán por brindar adaptaciones y servicios razonables para las personas que requieran asistencia especial para participar en esta oportunidad de participación pública. Para obtener más información sobre la accesibilidad a las reuniones o para obtener un Formulario de queja de Título VI, consulte PlanRVA.org o llame al Coordinador del Título VI al (804) 323-2033.

Acknowledgement

The Transportation Improvement Program (TIP) was prepared by PlanRVA staff in cooperation with the United States Department of Transportation (USDOT), Virginia Department of Transportation (VDOT), and the Virginia Department of Rail and Public Transportation (DRPT), and the Richmond Regional Transportation Planning Organization (RRTPO) member jurisdictions and agencies.

Disclaimer

The contents of this report reflect the analysis of the RRTPO as part of PlanRVA which is responsible for the facts and accuracy of the data presented herein. The contents do not necessarily reflect the official views or policies of the FHWA, the FTA, the DRPT, the VDOT, or the Board of the RRPDC. This report does not constitute a standard, specification, or regulation.

The FHWA, FTA, DRPT, or VDOT acceptance of this report as evidence of the fulfillment of the objectives of this program does not constitute endorsement or approval of the need of any recommended improvements nor does it constitute approval of their location and design or a commitment to fund any improvements. Additional project level environmental impact assessments and/or studies of alternatives may be necessary.

Introduction

The Richmond Region

The Richmond region is the area covered by PlanRVA or Virginia Planning District Commission 15 which is made up of the City of Richmond, the Town of Ashland,

VGIN, Esri, HERE, Gara FAO, NOAA, USGS, FI RRTPO Study Area Tri-Cities MPO Study

Exhibit 1: Richmond Region with Metropolitan Planning Area Boundary

and the counties of Charles City, Chesterfield, Goochland, Hanover, Henrico, New Kent, and Powhatan. The Richmond region covers 2,165 square miles, and is located approximately 100 miles south of Washington, D.C. and midway between Atlanta and

Boston.

According to the 2045 Long Range Growth Forecast Analysis prepared for ConnectRVA2045, the region had a population of 1.1 million people as of base year 2017. The Richmond region is forecast to grow by nearly 30%, reaching a total of 1.4 million residents by 2045. The largest gains in actual population are projected in the three largest localities, Chesterfield, Henrico, and the City of Richmond. In percentage terms, New Kent, Goochland, Powhatan, and Hanover counties are expected to see the highest population growth. This regional population will live in 552,000 households, an increase of nearly 125,000 households by 2045.

The City of Richmond is the capital of the Commonwealth of Virginia. Richmond region employers

provide more than 550,000 jobs for area residents. Henrico County remains the region's largest employment center. The region serves as home to Virginia Commonwealth University, the University of Richmond, Virginia Union University, Virginia State University, Randolph Macon College and Reynolds and Brightpoint Community Colleges with a collective enrollment of approximately 76,000 students.

The region's strategic location south of Washington DC and west of the Hampton Roads coastal area positions it to capitalize on the opportunities offered by its geography. The region is well served by the interstate transportation network, with I-95 and I-64 intersecting near its center. Routes 295 and 288 form an outer circular beltway system. Businesses and residents both prosper from the relatively short 24-minute, on average,

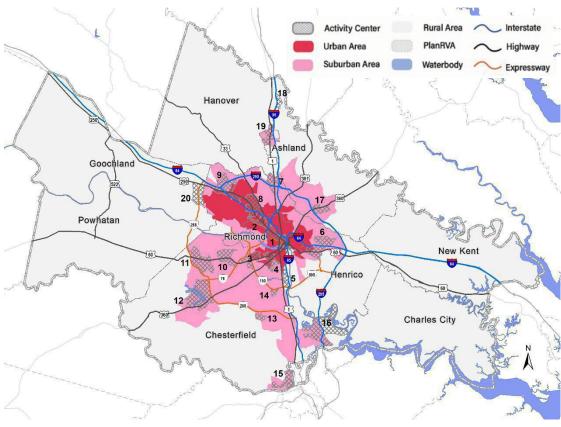

Exhibit 2: Map of Regional Activity Centers

sparsely populated rural counties. The 2017 population

work commute. Rail access provides connections to east coast and mid-west markets, and the region is well positioned to capitalize on anticipated increases in freight movement to the Port of Virginia in Hampton Roads.

The region includes both a well-developed urban core surrounded by vibrant older suburban neighborhoods and traditional subdivisions expanding into the more density map shows the City of Richmond with the emerging development pattern of a higher density ring following major thoroughfares extending from the center to meet the outer expressways. The southeastern quadrant of the region is a noticeable departure from this concentric pattern. The James River creates the natural boundary while Route 895 provides a connection between the 1-295 bypass and I-

95 with potential to facilitate more development by 2045. Employment densities following much the same pattern start to merge with population concentrations to define activity centers throughout the region. A mixed-use area where the density of commercial, industrial, and residential land uses is highest is more conducive to a variety of transportation options, including transit. Twenty (20) activity centers, ranging from urban to suburban to small town represent the areas of highest population and employment density within the Richmond region.

Richmond Regional Transportation Planning Organization (RRTPO)

The RRTPO is a policy-making organization made up of local elected officials from each of the region's nine member jurisdictions and state and federal transportation agencies, and area transportation service/system operators. The RRPDC serves as lead staff providing administrative and technical services for the RRTPO. In addition, the Virginia Department of Transportation (VDOT) and the Virginia Department of Rail and Public Transportation (DRPT) provide additional technical support.

The RRTPO serves as the forum for cooperative regional transportation decision-making. The RRTPO must carry out metropolitan transportation planning in cooperation with the state and transit providers. The RRTPO develops the region's transportation plans and programs, and approves the long-range transportation plan, ConnectRVA 2045, which is a prerequisite for the

allocation of federal-aid highway and transit funds. The development of an efficient and effective multimodal transportation network is essential for the region if it is to sustain a strong economy, clean environment, and high quality of life.

Metropolitan Planning Organizations (or Transportation Planning Organizations) are designated under Section 134 of Title 23, U.S. Code, for maintaining and conducting a "continuous, cooperative, and comprehensive" (3-C) regional transportation process that results in plans and programs consistent with adopted plans for development of the metropolitan area. Census defined urbanized areas of 50,000 or greater in population are designated as "MPOs". The Governor, with the concurrence of area local governments, is charged with designating the MPO's member organizations. The RRTPO is designated as a "Transportation Management Area (TMA)," defined as a metropolitan area with a population of over 200,000, creating additional requirements for transportation planning such as the Congestion Management Process (CMP).

Like many metropolitan areas, the RRTPO encompasses several jurisdictions, each with their own comprehensive plans and transportation programs. In Virginia, planning district commissions, which are established under state code to conduct regional planning, serve as TPO staff for most of Virginia's urbanized areas.

Member Jurisdictions and Partner Agencies

The following jurisdictions are voting members of the RRTPO with the number of votes apportioned according to population indicated in parenthesis:

- Charles City County (1)
- Chesterfield County (4)
- Goochland County (2)
- Hanover County (3)
- Henrico County (4)
- New Kent County (2)
- Powhatan County (2)
- City of Richmond (4)
- Town of Ashland (1)

Partner agencies which also hold one vote include the Capital Region Airport Commission, GRTC Transit System, Richmond Metropolitan Transportation Authority (RMTA), and VDOT (as the Secretary of Transportation's designee). Non-voting members represent other RRTPO committees and partner agencies.

TPO Study Area

Under federal requirements, the study area for the RRTPO must encompass both the existing urbanized area and contiguous area expected to become urbanized during the period covered by the long-range transportation plan. It must also cover areas designated by the Environmental Protection Agency (EPA) under the Clean Air Act as part of the non-attainment / maintenance area for air quality standards.

To ensure that the plan covers all urbanized areas, air quality attainment areas, and areas expected to become urbanized by 2045, the study area has been defined to include:

- Charles City County
- Goochland County
- Hanover County
- Henrico County
- New Kent County
- Powhatan County
- City of Richmond
- Town of Ashland
- A majority of Chesterfield County

The part of Chesterfield County not included in the RRTPO is contained in the Tri-Cities MPO study area. This includes those areas of Chesterfield County near Hopewell, Colonial Heights, and Petersburg.

The Transportation Improvement Program (TIP)

The TIP is the region's collaborative list of transportation investments for a four-year period. This TIP covers federal fiscal years 2024 to 2027 and is in effect starting October 1, 2023. The TIP includes:

- Projects awarded RRTPO's federal funds,
- Projects using federal and state dollars managed by the Virginia Department of Transportation (VDOT) or Department of Rail and Public Transportation (DRPT) and,

 Regionally significant projects, regardless of funding source, which must be included in the air quality analysis and conformity determination.

Development of the TIP is the region's opportunity to review regionally significant projects and projects awarded federal funding through various competitive processes to ensure they align with the goals and vision for the future in ConnectRVA 2045, the long-range transportation plan. Through the TIP process, the region works to develop consensus on a list of projects to move forward. Once a project is in the TIP, the project or a phase of the project can be authorized in a federal agreement under which the federal government commits to reimburse the state for a share of eligible costs. This commitment is called an obligation.

Projects or project phases are only included in the TIP if full funding for the project is reasonably anticipated to complete the project. To meet this requirement, the TIP includes a financial analysis showing how the planned projects can be undertaken with expected revenues.

After the TIP is approved, the TIP is included in the Statewide Transportation Improvement Program (STIP). The STIP includes all TIPs in the state as well as projects to be undertaken outside of MPO boundaries. The approved TIP documents are sent to the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) for review and acceptance.

Financial Plan

Introduction

Federal law requires the TIP include a financial plan showing how the proposed projects can be reasonably implemented with public and private funds. The revenue projections and project costs in the TIP have been cooperatively developed with the Virginia Department of Transportation (VDOT), Virginia Department of Rail and Public Transportation (DRPT), and Greater Richmond Transit Company (GRTC). The following tables show expected revenues and obligations for each of the four years covered by the TIP. In addition to construction projects, financial projections have also been made to show revenues for maintaining and operating the region's highway and transit systems during the same 4-year period.

Some projects listed in the TIP may have no planned obligations. These projects are included informational purposes. There are several reasons this may occur and include:

- The project is completed and awaiting final closeout.
- The project is already underway but the next phase will not happen during the four-year window covered by the TIP.

In addition, the TIP includes a section for illustrative projects. These are regional priority projects which cannot be achieved within the expected revenues but would be undertaken if additional funding sources are found. In general, these projects are expected to seek discretionary grant funding to allow for implementation.

The TIP funding summary tables summarize by year and by funding source the revenue amounts estimated and committed for fiscal year 2024 - 2027. The tables include expenditures and estimated revenues expected for each funding source and show that the program is financially constrained by year. The financial summary tables are based on total funds available, which include annual allocations of funds including any state and local matching dollars. These revenue sources are all reasonably expected to be made available and committed to the project phase during the programmed year of the TIP.

Highway Revenues

This section of the plan covers revenues and projects with oversight from the Virginia Department of Transportation (VDOT) and Federal Highway Administration (FHWA). This includes funds such as CMAQ and RSTP which are subsequently flexed to transit projects. This section of the financial plan contains four tables summarizing various aspects of financial planning for highway projects. Table 1 shows planned federal obligations for the fiscal years covered by the TIP. This table also includes state match funds and other non-federal contributions to projects.

Table 2 covers conversion of advance construction projects to federal obligations. Advance Construction is an innovative funding mechanism that allows states to proceed with projects without federal obligation authority while maintaining the ability to convert a project to federal obligations in the future. Funds in this table are shown based on the year of conversion to federal obligations.

Table 3 shows planned federal obligations for projects that impact the Richmond area but also serve other metropolitan planning areas (MPOs) or rural areas of the state. In general, these projects are either located Table 1: Federal Obligations, State and Local Matching Funds

along the interstate highway system or are programmatic in nature.

Table 4 shows funding programmed for maintenance of the existing highway system. This table demonstrates the region is adequately maintaining the condition of existing roadways and bridges while planning for capital improvements.

The revenue projections for this section of the plan were developed by VDOT and provided to the MPO.

Highway Program Descriptions

BR: Provides funding for bridge improvements both on and off the National Highway System (NHS).

CMAQ: Provides flexible funding for congestion reduction and air quality improvement projects and programs; funding only available for areas not meeting federal air quality standards or maintenance areas. Some of these projects are selected directly by the RRTPO consistent with the regional funding framework.

CRP/F: Funding for projects that reduce on-road emissions of climate change causing pollutants.

DEMO: Provides specialized funding to demonstration, priority, pilot, or special interest projects.

EB/MG: Historic program providing minimum guaranteed funding for localities.

HIP/F: Provides funding for restoration, repair, and construction of federal aid eligible roads, bridges, and tunnels.

HSIP: Funds projects to reduce traffic fatalities and serious injuries on public roads; set aside for Railway Highway Crossings Program.

NHFP: Provides funding to improve the movement of freight on the National Highway Freight Network (NHFN).

NHPP/E: Funds dedicated to improving infrastructure condition, safety, congestion reduction, system reliability, or freight movement on the NHS.

NHS/NHPP: Funds projects to construct new facilities on or improve the condition and performance of the National Highway System (NHS).

RSTP: Provides funding for a broad range of capacity, operational, and congestion mitigation related improvements. These projects are selected directly by the RRTPO consistent with the regional funding framework.

STP/STBG: Provides flexible funding for a wide range of eligible projects and programs to address state and local transportation needs.

TAP: Funding dedicated to bicycle and pedestrian facilities through the Surface Transportation Block Grant. Some of these projects are selected directly by the RRTPO consistent with the regional funding framework.

Transit Revenues

This section of the plan covers revenues and projects with oversight from the Virginia Department of Rail and Public Transportation (VDRPT) and Federal Transit Administration (FTA). This section includes projects from GRTC and smaller providers offering mobility options for seniors and people with disabilities. Table 5

summarizes projected revenues and obligations by year and funding source.

The revenue projections in this section were developed cooperatively with the Greater Richmond Transit Company (GRTC) and DRPT. For GRTC-directed formula funds, the revenue projections assume 80% federal, 20% local split for preventive maintenance. All other projects assume 28% federal, 68% state, 4% local split consistent with the minor enhancement category for DRPT's Making Efficient and Responsible

<u>Investments in Transit (MERIT)</u> Capital Assistance program.

For the FTA 5310 program, FFY2024 was carried over directly from the FY21 – FY24 TIP. For subsequent years, federal revenue is assumed to be equal to the 2022 apportionment without any escalation. Available state and local match for FY25 – FY27 assume the state's match policies and mix of projects from the FY21 – FY24 TIP will continue (24% operating assistance, 63% capital – non-vehicle, 13% capital – vehicle).

Transit Program Descriptions

FTA 5307: Provides funding to public transit systems in large urban areas for capital, planning, job access FY24-FY27 TIP

projects, and some operating expenses such as ADA paratransit and preventive maintenance.

FTA 5310: Program to assist local transit agencies, governments, and nonprofit groups in meeting needs of seniors and people with disabilities.

FTA 5339: Provides funding to transit agencies and states to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities.

Project List

Introduction

As a short-term plan for the next four years, the core of the TIP is the list of projects to be implemented in the near term. The TIP includes capital and non-capital surface transportation projects, bicycle and pedestrian facilities and other transportation enhancements, Federal Lands Highway projects, and safety projects. Projects that impact the capacity of arterials are considered "regionally significant" and are required to be individually listed in the TIP. By practice, all transit projects are also listed individually in the TIP. The TIP includes projects that receive FHWA or FTA funds, projects that require FHWA or FTA approval, and projects that are regionally significant but funded with other funds including state, local, and private sources.

Project Screening

Every project included in the FY24 – FY27 TIP was screened against the goals and objectives of ConnectRVA 2045, the region's long-range transportation plan (LRTP). These goals were developed through a cooperative, iterative process with input from members of the LRTP advisory committee and feedback from the public and were ultimately approved by the RRTPO's policy board. The goals and objectives are summarized below. More information about the development and selection of these goals and objectives can be found here.

- A. **Safety** improve the safety of the transportation system for all people
 - 1. Enhance safety and comfort of bicycle and pedestrian facilities.
 - 2. Work to eliminate all serious injuries and fatalities resulting from vehicular crashes.
- B. **Environment/Land Use** Reduce the negative impact the transportation system has on the natural and built environment.
 - Address roadways prone to flooding and consider climate impacts in transportation planning.
 - 2 Reduce transportation related pollutants, including decarbonizing transportation.
 - Reduce vehicle miles traveled (VMT) per capita.
 - Increase number and share of trips taken by shared and active transportation modes.
 - Tie land use planning to transportation investments through encouragement of walkable and transit-oriented communities.
 - Minimize impacts of transportation system on natural resources and communities with particular emphasis on Environmental Justice (EJ) populations.
- C. **Equity/Accessibility** Improve equitable access through greater availability of mode choices that are affordable and efficient

- Reduce trip lengths for all people with a focus on Environmental Justice (EJ) populations.
- 2. Increase access to jobs and community services via transit, walking, and biking for all people with a focus on EJ populations.
- D. **Economic Development** Improve connectivity and mobility for strong economic vitality
 - 1. Reduce peak period travel times.
 - 2. Increase transportation investment which focuses on economic vitality.
 - Improve reliability and accessibility of travel to and within the regional activity centers.
 - 4. Reduce freight bottlenecks.
 - 5. Increase multimodal access to tourist destinations.
- E. Mobility Increase travel efficiency and mode choices by maintaining the transportation system in a state of good repair
 - Increase the percentage of complete streets across the highway network to maximize use of available capacity.
 - Increase system efficiency through operational, transportation demand management (TDM), and technologybased solutions.
 - Improve system reliability across all modes.

Each project was screened to assess the project's ability to help meet the objectives. This

assessment ensures projects that are implemented advance the region's planning goals.

How to Read a Project

The RRTPO has taken a web-first approach to the TIP and public accessibility. All projects can be found in an interactive format at https://www.rrtpotip.org. These pages include project details, maps (where available), consistency with ConnectRVA goals, planned obligations, and the ability to comment directly on the project. An example of the page format is below.

In this document, projects are also listed in a format that matches that Statewide Transportation Improvement Program (STIP).

UPC NO		VPRA001	SCOPE	Hanover Third Tr	ack (Siding C)		
SYSTEM		Primary	JURISDICTION	Hanover		OVERSIGHT	
PROJECT		Hanover Third Tr	ack (Siding C)			ADMIN BY	VPRA
DESCRIPTION		Hanover Third Track (Siding C) is a Phase 1 Transforming Rail in Virginia (TRV) project that is strategically located to allow freight and passenger trains to utilize the sidings and fluidly move traffic through the corridor between Washington, D.C. and Richmond. Siding C is one of three sidings that is included in the Phase 1 of TRV. These improvements will increase network fluidity and reduce delays due to passenger and freight train interference and lay the groundwork for a dedicated third track from Alexandria to Spotsylvania. Siding C is 2.9 miles long and stretches from Milepost 15.5 to Milepost 18.7. TIP AMD – Add new project. Project is Amtrak Funded. Included for information and coordination					
PROGRAM NOT	M NOTE TIP AMD – Add new project. Project is Amtrak Funded. Included for information and coordination purposes only					dination

Project Groups

Introduction

Many projects which use federal funds do not add capacity to the regional transportation network or create new connections. Some examples of these more minor projects include cleaning highway signs, bridge safety inspections, and constructing sidewalks where none exist currently.

Federal law allows funds to be set aside to cover groups of smaller projects. The projects and project details within each group can change without triggering the TIP modification process, providing additional flexibility. As the projects within each grouping can change, VDOT provides regular updates online. By practice, public transportation projects are all individually listed in the TIP and STIP.

As with other projects, any changes to the planned obligations or total cost of these groupings require TIP amendments or adjustments as detailed in the Modifications section of this document.

Bridge Rehabilitation, Replacement, and Reconstruction

These funds cover bridge construction projects such as bridge or drainage structure rehabilitation, and reconstruction or replacement when said work is on or adjacent to the same alignment.

Rail

These funds cover projects for rail/highway grade crossing improvements, regardless of funding source. Examples include improvements to warning devices, crossing surfaces, and construction of grade separation to replace existing at-grade railroad crossings at the same location.

Recreational Trails

These funds cover projects funded and advanced as part of the recreational trails program through the Department of Conservation and Recreation.

Transportation Enhancement, Byway, and Other Non-Traditional Projects

These funds cover projects with scopes of work eligible for funding under the former Transportation Enhancement and Transportation Alternatives Programs, and the Transportation Alternatives (TA) Set-Aside of the Surface Transportation Block Grant Program, regardless of funding source. Examples include construction of interpretive pull-offs and overlooks, welcome centers, pedestrian and bicycle facilities, parking facilities, and wildflower plantings

Preventive Maintenance and System Preservation

These funds cover projects such as area wide programs for cleaning drainage facilities, corrosion protection activities, highway sign face cleaning, and retrofitting of dowel bars. In addition, pavement preservation projects that are of a preventative nature that extend pavement life between 2 and 10 years and typically involve the surface layer of the pavement structure. Finally, this group includes pavement resurfacing, restoration, and rehabilitation (3R) activities that are limited to the bound layers of the pavement and typically extend pavement life between 12 and 20 years.

Preventive Maintenance for Bridges

These funds cover eligible bridge activities such as sealing, replacing, or reconstructing joints; deck overlays; painting; cathodic protection; retrofit of fracture critical members and fatigue prone details; and some concrete repairs. This group also includes bridge safety inspections.

Traffic and Safety Operations

These funds cover projects which include signs, traffic signals, pavement markings and markers, guardrail, replacement or preventive maintenance of roadway lighting, maintenance, replacement, or upgrade of traffic calming devices.

Transit Access

These funds cover projects which provide bicycle or pedestrian facilities which increase access to transit services.

Transit Ridesharing

These funds cover projects which include continuation of ridesharing and van-pooling promotion activities at current levels.

Transit Vehicles

These funds cover projects which include purchase or lease of new buses and rail cars to replace existing vehicles or for minor expansions of the fleet, rehabilitation of transit vehicles, and the purchase of support vehicles. This also includes the purchase of operating equipment for vehicles such as radios, fareboxes, and lifts.

Illustrative Projects

Introduction

Under federal law, the TIP must be fiscally constrained, meaning the projects that are listed must have identified funding sources. Localities and transit agencies continue to plan for and pursue funding for other high priority projects. The <u>Illustrative Projects</u> <u>List</u> in this section provides information on priority projects from <u>ConnectRVA 2045</u>, the long-range transportation plan, that the RRTPO has endorsed for federal discretionary funding. Projects on this list are supported by the RRTPO for any federal discretionary grants and earmark funding, and the RRTPO will amend the TIP to add these projects to the constrained TIP if funding is awarded.

Modifications

Introduction

The TIP is an ever-evolving list of transportation priorities. It changes on a regular basis to include new projects or project phases. A TIP modification is any change that is made between full updates of the TIP. There are three types of TIP modifications: (1) amendments, (2) administrative modifications, and (3) technical corrections. RRTPO coordinates modifications with VDOT and DRPT to ensure consistency between the TIP and the STIP. All completed modifications are listed on the impacted project page and in a separate Amendments and Adjustments document on the RRTPO website for easy reference.

Amendments

TIP amendments are the most significant type of TIP modification. An amendment involves a major change to a project. The list below provides examples of TIP amendments:

- Adding or removing a project or phase
- Changing the start date significantly for the project or phase
- Revising the design concept or scope in a significant way such as changing the project limits, the number of lanes in a highway project, or the number of stations for a transit project

- Modifying the TIP in any way that triggers an updated air quality conformity analysis
- Increasing project or phase cost. Details about the sliding scale used to determine if a cost increase is significant can be found in the STIP procedures manual here.

All amendments are made available for public review and comment consistent with the <u>Public Engagement Plan</u>. Amendments require an updated demonstration of fiscal constraint and, if the project is not exempt, a determination of air quality conformity. Amendments are incorporated into the STIP and are subject to Federal approval.

Amendments are reviewed by the Technical Advisory Committee (TAC) and approved by the Policy Board.

Administrative Modifications

Administrative modifications, also known as adjustments, are minor changes to the TIP. Examples of minor changes include:

- Changing the start date for the project or phase by a small amount
- Revising the design concept or scope in a limited way
- Increasing project or phase cost below the sliding scale threshold for an amendment

- Revising the funding source such as updating the type of federal funding or replacing non-Federal with Federal funding
- Splitting or combining projects already included in the TIP without changes to cost, scope, or schedule
- Updating the project or phase name
- Switching the lead agency administering the project

Administrative modifications do not undergo public review, a demonstration of fiscal constraint, or a determination of air quality conformity. These modifications do not require Federal approval.

Administrative modifications are processed by RRTPO staff with the agreement of the affected locality or agency and submitted to VDOT or DRPT as needed.

Technical Corrections

The last type of modification is the technical correction. These corrections include typographical, grammatical, or syntactical errors that address, for example, an error in spelling, grammar, deletion of a redundant word or formatting that was inadvertently published. It does not include changes to funding amounts. Technical corrections do not require Federal approval.

FY24- FY27 TIP

78

Performance Targets

Introduction

Federal law establishes performance measures to ensure states and metropolitan planning organizations (MPOs) are investing in projects that contribute towards national goals. The USDOT has published rules for states and MPOs to collect data and establish performance targets that will support performance-based investment decisions. The Transportation Improvement Program (TIP) must include a description of the anticipated effect of the TIP toward achieving the performance targets identified by the MPO. The TIP must also demonstrate the link between investment priorities in the TIP and achievement of performance targets in the plans. A summary of each set of performance targets and the relation to investment decisions is included below.

Roadway Safety

This measure focuses on reducing fatal and severe injuries for all users, including both motorized and non-motorized modes of travel. Fatalities and injuries are measured in both total number and rate per 100 million vehicle miles travelled (VMT). A separate target is also set for non-motorized modes such as biking and walking to reflect the importance of protecting more vulnerable road users. The safety target is reviewed annually. The RRTPO has adopted the following targets for 2023.

Table 1: Roadway Safety Performance Targets

Target Description	Target
Fatalities	103
Fatalities per 100M VMT	0.986
Serious Injuries	886
Serious Injuries per 100M VMT	8.462
Non-Motorized Fatalities & Serious Injuries	113

To achieve the targets for fatalities and injuries across the region, funding is prioritized in both state and regionally administered programs for projects that are expected to reduce crashes resulting in fatalities or severe injuries. Some of the major funding programs with a focus on safety in evaluating applications are summarized below.

Table 2: Safety Weighting in Funding

Funding Program	Weight
RSTP (RRTPO)	25%
CMAQ (RRTPO)	25%
VHSIP (state)	100%
Smart Scale (state)	20%
CVTA regional (CVTA)	38.5%

In the FY24 – FY27 TIP, \$40,213,747 in Highway Safety Improvement Program (HSIP) funding is dedicated to safety improvements throughout the region.

Beyond dedicated safety funds, the Safety/ITS/ Operational Improvements project group has \$274,712,462 dedicated to improvements which enhance safety and operations on existing roadways.

To improve the safety of more vulnerable non-motorized road users, \$82,373,060 is programmed toward active transportation improvements in the Transportation Alternatives/Byway/Non-Traditional project group. These investments are expected to provide safer connections for non-motorized road users, reducing fatalities and serious injuries.

Pavement Condition

This measure focuses on the condition of pavements along interstates and non-interstates that form the National Highway System (NHS). In planning and programming federal funds, MPOs are required to emphasize preservation of the existing transportation system. The RRTPO has adopted the following targets for pavement conditions for the next four years.

Table 3: Pavement Condition Performance Targets

Target Description	Target
Interstate Pavement in Good Condition	45%
Interstate Pavement in Poor Condition	3%
Non-Interstate Pavement in Good Condition	25%
Non-Interstate Pavement in Poor Condition	5%

Highways maintenance is primarily the responsibility of the Virginia Department of Transportation, particularly in the case of the interstates and state primary highways that form the NHS. Some localities including the Town of Ashland, Henrico County, and the City of Richmond own and maintain their own roadways to varying extents.

To ensure pavements throughout the state are maintained in good condition, funding for maintenance is set aside before distribution to the various competitive programs. Additionally, the State of Good Repair program makes funding for reconstruction and rehabilitation available for interstate and primary routes through a prioritization process.

In the FY24 – FY27 TIP, \$134,737,913 in federal funds are programmed for Preventive Maintenance and System Preservation. These funds are expected to help meet the pavement condition targets and represent approximately 22% of the total federal funding programmed in the TIP.

Bridge Condition

This measure is like the pavement condition target but focused on the condition of the deck or surface of bridges on the National Highway System (NHS) that are included in the National Bridge Inventory (NBI). The RRTPO has adopted the following targets for bridge deck condition for the next four years:

Table 4: Bridge Condition Performance Targets

Target Description	Target
Deck Area of Bridges in Good Condition	25.1%
Deck Area of Bridges in Poor Condition	3.6%

80

The primary funding source for bridge rehabilitation is the State of Good Repair program. This program provides funding for structurally deficient bridges (bridges in poor condition). Other funding programs such as RSTP or the Central Virginia Transportation Authority (CVTA) regional program have also provided funding for bridge projects.

Bridge funding generally falls under either preventive maintenance, including deck overlays and inspections, or bridge rehabilitation, replacement, or reconstruction project groups. These two funds program \$227,957,388 to support these bridge deck condition targets.

Roadway Performance

This measure focuses on the consistency or dependability in the travel time of a trip weighted by the number of people travelling along a corridor. This measure looks at the longest 20% of travel times along the corridor relative to the median travel time. If travel time is at least 50% longer than normal during the worst periods, the segment is deemed unreliable. Each road segment is weighted by length, traffic volume, and vehicle occupancy to calculate the percentage of person-miles that are reliable. RRTPO has adopted the following targets for the next four years.

Table 5: Reliability Performance Targets

Target Description	Target
Person-Miles Travelled that are Reliable	85%
(Interstate)	, _

Person-Miles Travelled that are Reliable	88%	
(Non-Interstate)	00/0	

To achieve the targets for reliability across the region, funding is prioritized in both state and regionally administered programs for projects that are expected to reduce congestion and improve reliability. While congestion is not the same as reliability, the two measures are closely related. Congested roads are more likely to experience delays due to unexpected events (such as crashes or lane closures) and reducing non-recurrent congestion improves reliability. Some of the major funding programs with a focus on congestion or reliability in evaluating applications are summarized below.

Table 6: Reliability and Congestion Weighting in Funding

Funding Program	Weight
RSTP (RRTPO)	15%
CMAQ (RRTPO)	15%
Smart Scale (state)	15%
CVTA regional (CVTA)	23%

Improvements to congestion bottlenecks and unreliable segments of the NHS are expected to improve regional performance toward these measures. Identified projects based on the RRTPO's Congestion Management Process (CMP) include:

- UPC 102952 RTE 10 (I-95 Rt 1) WIDENING
- UPC 120374 #I64CIP I-64WB EXIT 181 IMPROVE INTERCHANGE CONFIGURATION

- Grouped projects (Construction: Safety/ITS/Operational Improvements):
 - UPC 101034 #HB2.FY17 RTE 6 PATTERSON AVE AT PARHAM RD INTERSECTION
 - UPC 112051 I-195 SAFETY IMPROVEMENTS
 - UPC 115412 #SMART20 RCUT Route 60 and Woolridge\Old Buckingham

Freight Movement

This measure is like roadway performance but focuses on the reliability of travel for trucks on the interstates. This measure looks at the median travel time and compares it with the longest five percent (5%) of travel times for the same corridor. A lower Target (closer to one) indicates more reliable travel. The RRTPO has adopted the following target for the next four years.

Table 7: Truck Reliability Performance Target

	Target
Truck Travel Time Reliability Index	<1.56

To achieve the targets for truck travel time reliability across the region, funding is prioritized in both state and regionally administered programs for projects that are expected to reduce congestion and improve reliability, with a focus on truck movement. As noted under roadway performance, congestion and reliability are closely connected and improvements to congestion often improve reliability. Some of the major funding programs with a focus on congestion or

reliability for truck travel in evaluating applications are summarized below.

Table 8: Freight Reliability in Funding

Funding Program	Weight
RSTP (RRTPO)	3.75%
CMAQ (RRTPO)	3.75%
Smart Scale (state)	4%

Improvements to unreliable freight segments of the interstate are expected to improve regional performance toward these measures. Identified projects based on the RRTPO's Congestion Management Process (CMP) include:

- UPC 107458 #HB2.FY17 RTE 64 MAJOR WIDENING
- Grouped Projects (Construction: Safety/ITS/Operational Improvements)
 - UPC 109320 #HB2.FY17 SB I95 Belvidere
 St Interchange Safety Improvement
 - UPC 109321 #HB2.FY17 RTE 95 IMPROVE INTERCHANGE AT MAURY ST
 - UPC 109322 #HB2.FY17 RTE 95 -IMPROVE INTERCHANGE AT RTE 10

Transit Asset Management

This measure focuses on the condition of vehicles and facilities owned and operated by public transportation service providers. All rail operators and fixed and non-fixed route providers with more than 100 vehicles (Tier 1 agencies) set their own performance targets and

develop a Transit Asset Management (TAM) plan. Smaller, non-rail providers (Tier 2 agencies) can choose to follow a group asset management plan developed by the state rather than developing their own targets. The Greater Richmond Transit Company (GRTC) is a Tier 1 agency.

GRTC has adopted policies for asset management for revenue vehicles, non-revenue vehicles, and facility conditions in the <u>Transit Asset Management Plan</u>. The targets for vehicles are set as a percentage of vehicles at or beyond their <u>useful life benchmarks (ULB)</u>, an FTA developed measure of expected useful life of a vehicle. Facilities are assessed based on the percentage classified as marginal or poor (less than 3 on the 5-point TERM scale). A summary of the targets by asset class for 2023 is included below.

Table 9: GRTC TAM Performance Targets

Target Description	Target
Rolling Stock	
AO - Automobile	35%
BU – Bus	20%
BR – Over the Road Bus	20%
CU - Cutaway	35%
Equipment	
Automobiles	100%
Trucks & Other Rubber Tired Vehicles	72%
Facilities	
Administrative/Maintenance Facilities	33%
Passenger/Parking Facilities	10%

In addition to GRTC, the eastern portions of the region are served by Bay Transit, a nonprofit community transit service. Bay Transit is a Tier 2 provider which has opted into the state-sponsored group plan published October 1, 2022. The performance targets for 2023 are summarized below.

Table 10: DRPT Tier 2 TAM Performance Targets

Target Description	Target
Rolling Stock	
AB – Articulated Bus	5%
BU – Bus	15%
BR – Over the Road Bus	15%
CU - Cutaway	10%
MV – Minivan	20%
VN - Van	20%
Equipment	
Automobiles	30%
Trucks & Other Rubber Tired Vehicles	30%
Facilities	
Administrative Facilities	10%
Maintenance Facilities	10%
Passenger Facilities	15%
Parking Facilities	10%

In allocating funds, DRPT prioritizes State capital assistance provided to transit agencies via the <u>MERIT Capital Assistance Program</u>. The MERIT program is designed to favor projects that:

- Achieve the statewide policy objective of maintaining a state of good repair of existing assets and,
- Have the greatest impact on the provision of public transportation services throughout the state.

To achieve these targets, the region is investing significantly in the replacement of rolling stock. In total, the TIP programs \$44,598,150 for maintaining GRTCs fleet in a state of good repair.

Additionally, just over \$1 million is planned to be invested in support vehicles and \$575,000 is programmed to renovations of administrative and maintenance facilities. These investments will help the region to meet the designated targets for asset management.

Transit Safety

This measure focuses on the safety of public transportation, specifically fatalities, injuries, safety events, and the frequency of these incidents in terms of both of revenue miles and distance. All rail operators and fixed and non-fixed route providers with more than 100 vehicles (Tier 1 agencies) set their own performance targets and develop a Transit Asset Management (TAM) plan. Smaller, non-rail providers (Tier 2 agencies) can choose to follow a group asset management plan developed by the state rather than developing their own targets. The Greater Richmond Transit Company (GRTC) is a Tier 1 agency.

GRTC has developed policies and targets for reducing fatalities, injuries and safety events which were originally adopted on July 21, 2020. The targets for 2023 are summarized below.

Table 11: GRTC Safety Targets

Target Description	Target
Fixed Route	
Fatalities (total reportable)	0
Fatalities (per revenue mile)	0
Injuries (total reportable)	108
Injuries (per revenue mile)	0.13
Safety Events (total)	144
Safety Events (per revenue mile)	0.22
Distance between Major Failures	9,500 mi.
Distance between Minor Failures	3,200 mi.
Paratransit/Demand Response	
Fatalities (total reportable)	0
Fatalities (per revenue mile)	0
Injuries (total reportable)	60
Injuries (per revenue mile)	0.05
Safety Events (total)	96
Safety Events (per revenue mile)	0.15
Distance between Major Failures	15,500 mi.
Distance between Minor Failures	5,200 mi.

To achieve these safety targets, the region has prioritized investments in preventive maintenance for GRTC rolling stock. Total spending on preventive maintenance exceeds \$33 million for the four years covered by the TIP.

The TIP also programs \$600,000 in additional security equipment for the GRTC system. This equipment will help to reduce injuries and safety events on the system.

Congestion Mitigation & Air Quality

As an attainment area under the 2015 National Ambient Air Quality Standards (NAAQS), RRTPO is not required to adopt the CMAQ standards.

Conformity Assessment

Introduction

The Richmond-Petersburg Area was previously designated a nonattainment area under the 1997 ozone standard and later a maintenance area before being designated an attainment area under the 2008 ozone standard. The area is currently in attainment for all standards including the 2015 ozone standard.

In February 2018, the D.C. Circuit Court issued a decision in South Coast Air Quality Management District v. EPA which impacted areas like the Richmond-Petersburg Area that had been designated nonattainment and/or maintenance under the 1997 ozone standard but designated attainment under the 2008 ozone standard. One of those impacts is that new, updated, or amended Transportation Improvement Program and Long-Range Transportation Plan must

demonstrate conformity in keeping with the antibacksliding requirements associated with the revocation of the 1997 ozone standard.

A copy of the Richmond Regional Conformity
Assessment report which includes the FY 2024-2027
Transportation Improvement Program and 2045 Long-Range Transportation Plan (as well as the Tri-cities area plans) for the 1997 ozone standard can be found on the RRTPO website. The conformity analysis was prepared in accordance with EPA's November 24, 1993, Final Rule on Criteria and Procedures for Determining Conformity and subsequent rulemakings related to ozone. The RRTPO resolution approving the conformity analysis is attached as an informational item.

POLICY BOARD AGENDA 5/18/23; ITEM A-6-c.

Regional Conformity Assessment

Richmond Regional Transportation Planning Organization

On motion by W. Canova Peterson, seconded by John H. Hodges, of the RRTPO Policy Board voted to approve the following resolution:

Resolved, that the Richmond Regional Transportation Planning Organization (RRTPO) adopts the Richmond and Tri-Cities FY2024 - FY2027 Transportation Improvement Program and 2045 Long-Range Transportation Plan Regional Conformity Assessment as presented.

This is to certify that the Richmond Regional Transportation Planning Organization Policy Board approved the above resolution at its meeting held May 78, 2023.

Public Engagement and Comments

Introduction

The Richmond Regional Transportation Planning Organization (RRTPO) is committed to providing opportunities for the public to learn about and participate in the development of regional transportation plans. Regarding the development of the Transportation Improvement Program (TIP), federal regulations stipulate that the TIP development process must include opportunities for public involvement (23 CFR 450.324(b)), as outlined in the RRTPO's Public Engagement Plan (23 CFR 450.316(a)).

TIP Development Process

The RRTPO's Public Engagement Plan was adopted in March 2020 guide outreach and engagement efforts as part of the development of the FY24 – FY27 TIP. Major milestones in the development of the TIP include:

- 1. Develop draft project schedule and public outreach strategy. (Summer 2022)
- 2. Present project schedule to Technical Advisory Committee (TAC). (August 2022)
- 3. Develop TIP website for public review and increased transparency. (Fall 2022)
- Develop draft TIP document in coordination with VDOT, DRPT, and member agencies. (Winter 2022 – 2023)
- 5. Approve project list for conformity. (March 2023)
- 6. Open public review of draft TIP. (March 2023)

- 7. Review public comments and respond. (April 2023)
- 8. Adopt FY24 FY27 TIP. (May 2023)

Outreach Efforts and Opportunities

In developing the TIP, the RRTPO aims for both broad and targeted outreach. The Public Engagement Plan requires the TPO to develop a project specific engagement strategy which employs best practices as identified in the public engagement toolkit. For this TIP, the TPO settled on four major forms of engagement:

- Public Meetings
- Mailing/Email Lists
- Open Houses, and
- A new TIP website

Major decisions and announcements are always handled by the TPO in public meetings, making this tool a natural fit for updates and seeking public comment on the TIP. All meetings of the RRTPO and its various committees are livestreamed online, available for later viewing in a video archive, and allow for public comment both in person and virtually. Major presentations or actions by the RRTPO policy board and technical advisory committee include schedule updates (2 meetings), project review and approval (2 meetings), and adoption of the TIP (2 meetings).

The RRTPO also maintains a mailing list of interested parties which is used to provide opportunities for input on major planning efforts. This list was used as part of the TIP development to notify the public of upcoming board meetings and comment opportunities. In total 209 people were contacted through this list and invited to participate in the planning process. Both the RRTPO website and the TIP website offered public opportunities to subscribe to RRTPO updates.

The third approach to engagement used in developing the TIP was open houses during the public comment period. RRTPO staff hosted one (1) open house which was advertised in the Richmond Times Dispatch and the Richmond Free Press in the two weeks leading up to the event. Additionally, the public comment period and open house was promoted on social media platforms including LinkedIn, Facebook, and Twitter.

Finally, the RRTPO took a web-first approach to developing the TIP with project information and mapping available at a new website:

https://www.rrtpotip.org. This interactive page allowed anyone interested in the TIP to view project information, search by map or project information, and provide comments in general and directly on projects. A total of 809 unique visitors used the site during the 30-day review period. Three (3) comments were submitted requesting to be added to the interested parties list, but no substantive comments were received which required a response or changes to the plan.

Opportunities to comment on the TIP are not limited to the TIP update process. The TIP is regularly revised to accommodate projects development schedules. The RRTPO welcomes input on specific projects contained in the TIP and the format of the TIP on an on-going basis. The TIP website will be used to provide notice of any amendments during the life of the TIP and will serve as a key component of continuous public engagement.

Public Comments and Responses

No comments requiring a response were submitted during the public review period.
