Greater RVA Transit Vision Plan: Near-Term Strategic Technical Analysis

Implementation Feasibility Evaluation

Steering Committee Meeting #3
Agenda

- Study Purpose and Methodology Overview
- Initial Screening and Detailed Analysis Recap
- Service Plan and O&M Cost Assumptions
- Capital Cost Assumptions
- Discussion of Corridor Benefits with Service Plan, O&M Cost, and Capital Cost Options
- Corridor Service Plan, O&M Costs, and Capital Costs Options
- Implementation Steps to Consider
- Next Steps
Study Purpose & Methodology Overview
Study Purpose

- Build upon the Greater RVA Transit Vision Plan (2017) and recent transit improvements in the Richmond Region

- Identify recommendations for high-frequency routes that can be implemented in the near-term to advance toward the long-term vision
Analysis Methodology

- Activity Density
- Employment & Working Populations
- Environmental Justice & Transit-Dependent Populations
- Existing Network Layout
- Near-Term Development
- Rider Feedback
- Steering Committee Feedback

Initial Screening

Detailed Analysis
- Community Facilities
- Pedestrian Network and Connectivity
- Roadway Suitability
- Potential Ridership

Implementation Feasibility
- Service Plan Options
- O&M Cost Estimates
- Capital Cost Estimates
- Project Benefits
- Funding Resources

WE ARE HERE
Initial Screening and Detailed Analysis Recap
Initial Screening Analysis

- Evaluated 20 high-frequency routes identified in Greater RVA Transit Vision Plan
- Purpose was to determine viability of high frequency service for near-term implementation
- Evaluation considered:
  - Activity density
  - Employment and working populations
  - Environmental justice and transit-dependent populations
  - Existing GRTC network layout
  - Potential near-term transit supportive development
  - Steering committee feedback
Corridors Selected for Detailed Analysis

Legend
- Detailed Analysis Corridors
- Initial Screening Corridors
- Existing GRTC Service
- Local
- Express
- Pulse BRT

- Henrico County Courts
- Reynolds Community College
- Short Pump
- Regency Square
- University of Richmond
- Chesterfield Towne Center
- Chippenham Hospital
- Richmond Airport
- VA Hospital
- John Tyler Community College
- Richmond Airport
Detailed Analysis

- Further evaluation of corridors identified in the initial screening phase
- Detailed analysis evaluated:
  - Access to community facilities
  - Walkability
  - Pedestrian network and connectivity
  - Roadway suitability
  - Ridership potential
Corridors Selected for Implementation Feasibility

Legend

- Corridors Selected for Implementation Feasibility
- Detailed Analysis Corridors
- Initial Screening Corridors

A. Broad Street – Short Pump
(Willow Lawn to Bon Secours Short Pump)

D. Midlothian Turnpike
(Downtown Richmond to Huguenot Road)

E. West End South
(Downtown Richmond to Regency Square)

F. Airport via Route 60
(Downtown Richmond to Richmond Airport)

H. Route 1 to Ashland
(Downtown Richmond to Parham Road)
Service Plan and O&M Cost Assumptions
Corridor Service Plan and O&M Cost Assumptions

- Two scenarios defined for each corridor:
  - “Option 1” that typically assumes 15-minute service on the inner portion of the alignment and 30-minute service on the outer portion of the alignment (exceptions with Corridors A and F)
  - “Option 2” that assumes 15-minute service (peak and midday) on the entire alignment

- Seven day a week service with late evening service assumed for all corridors
- Modifications to existing GRTC routes to accommodate proposed corridor routes into the current network and to isolate operating needs specific to the recommended corridors alone
- Modifications to existing GRTC routes do not represent ultimate recommended service changes, which would need to be addressed prior to implementation of corridor service improvements
- Annual O&M costs estimated with a rate of $7.627 per total bus-mile (rate provided by GRTC)
Example - Corridor H: Route 1 North

Existing

Route 1A
- Chamberlayne/Wilmer – Spring Rock Green
- 30-minute daytime service, hourly service in evenings
- Hourly Sunday service

Route 1B
- Chamberlayne/Wilmer – Warwick
- Hourly daytime service during weekdays and Saturdays
- No evening/Sunday service

Route 1C
- Chamberlayne/Wilmer - Chippenham Mall
- Hourly service, seven days a week

Trunk (north of Southside Plaza)
- 15-minute daytime service from Southside Plaza to Chamberlayne/Wilmer
- 30-minute evening and Sunday service
Example - Corridor H: Route 1 North

**Option 1**

**Corridor H Route**
- 15-minute service daytime and evening between Downtown – Chamberlayne/Wilmer during weekdays and Saturdays
- 30-minute service daytime and evening between Chamberlayne/Wilmer– Parham during weekdays and Saturdays (every other bus) and on Sunday
- 30-minute frequencies for full corridor during Sunday service

**Route 1A**
- Downtown – Spring Rock Green
- 30-minute daytime service, hourly service in evenings
- Hourly Sunday service

**Route 1B**
- Downtown – Warwick
- Hourly daytime service during weekdays and Saturdays
- No evening/Sunday service

**Route 1C**
- Downtown – Chippenham Mall
- Hourly service, seven days a week

**Trunk (north of Southside Plaza)**
- 15-minute daytime service from Southside Plaza to Downtown
- 30-minute evening and Sunday service
Option 2

Corridor H Route
- 15-minute service daytime and evening during weekdays and Saturdays
- 30-minute frequencies during Sunday service

Route 1A
- Downtown – Spring Rock Green
- 30-minute daytime service, hourly service in evenings
- Hourly Sunday service

Route 1B
- Downtown – Warwick
- Hourly daytime service during weekdays and Saturdays
- No evening/Sunday service

Route 1C
- Downtown – Chippenham Mall
- Hourly service, seven days a week

Trunk (north of Southside Plaza)
- 15-minute daytime service from Southside Plaza to Downtown
- 30-minute evening and Sunday service
Corridor Capital Cost Assumptions

- Provide a variety of potential infrastructure improvements that could be implemented in each corridor
- Align with service options
- Account for vehicle, bus stop, shelter, sidewalk, intersection, and transit technology costs
- Based on current local capital costs and cost estimates from GRTC, Chesterfield County, Henrico County, City of Richmond, and VDOT
- Costs are in present year dollars
Component Assumptions

Vehicles

- Based on GRTC-contracted price for 40-foot Gillig CNG Low-Floor
- Only accounts for additional vehicles needed, as described in O&M cost estimate
- Unit Cost: $467,000 per bus

Bus Stops

- Only new bus stops in portions of the corridor not currently served
- New bus stops are spaced every ¼ mile on both sides of the road, no specific locations identified
- Include bench, sign, trash can, and waiting area pad
- Based on estimates for bus stops for Route 1 in Chesterfield, GRTC-contracted costs, and bid costs for projects in Richmond, Henrico, and Chesterfield
- Unit Cost: $9,000 per bus stop
Component Assumptions

Shelters
- Only in portions of the corridor with activity density to support BRT/Express Bus service, as defined by DRPT’s Multimodal Design Guidelines (>25 people and jobs per acre)
- New shelters are spaced every 1 mile on both sides of the road, no specific locations identified
- Based on GRTC-contracted costs for large shelters and installation
- Unit Cost: $23,000 per shelter

Sidewalks
- Only in portions of the corridor without any existing sidewalks
- Low cost based on per mile cost in Virginia Concrete Construction Company estimates for Route 1 improvements in Chesterfield and estimate for John Rolfe Parkway project in Henrico
- High cost based on per mile cost in VDOT TMPD planning level cost estimates and Wistar Road project in Henrico
- Unit Costs:
  - Low: $510,000 per mile
  - High: $1,012,000 per mile
Component Assumptions

Intersection Improvements

▪ Includes pedestrian signal heads, push buttons, marked crosswalks, and ADA ramps

▪ Assumed only signalized intersections outside of Richmond city limits

▪ Based costs on a variety of projects in Richmond, Henrico, and Chesterfield

▪ Unit cost: $48,000 per signalized intersection

Transit Signal Priority

▪ Includes hardware for total buses operating on corridor and each signalized intersection in the corridor

▪ Based on cost estimate used for proposed TSP project for Hampton Roads Transit

▪ Unit costs:
  ▪ $9,000 per signalized intersection
  ▪ $7,000 per bus
# Example - Route 1 North (H)

### Corridor Ridership Potential:
1,000 – 1,700 daily passengers*

*Ridership Potential is inclusive of existing corridor ridership
Corridor D: Midlothian Turnpike
**Corridor D: Midlothian Turnpike**

### Existing

**Route 1A**
- Chamberlayne/Wilmer – Spring Rock Green
- 30-minute daytime service, hourly service in evenings
- Hourly Sunday service

**Route 1B**
- Chamberlayne/Wilmer – Warwick
- Hourly service
- No evening/Sunday service

**Route 1C**
- Chamberlayne/Wilmer - Chippenham Mall
- Hourly service

**Trunk (north of Southside Plaza)**
- 15-minute peak/midday service from Southside Plaza to Chamberlayne/Wilmer
- 30-minute evening and Sunday service
Option 1

Corridor D Route
- 15-minute service daytime and evening between Downtown – Spring Rock Green during weekdays and Saturdays
- 30-minute service daytime and evening between Spring Rock Green – Chesterfield Towne Center during weekdays and Saturdays and on Sunday (served by every other bus)
- 30-minute frequencies for full corridor during Sunday service

Route 1 North
- Chamberlayne/Wilmer – Downtown
- Maintain current service levels
- 15-minute peak/midday service
- 30-minute evening and Sunday service

Route 1B
- Southside Plaza – Chippenham Hospital circulator
- No longer one-seat ride to Downtown
- Hourly service, seven day a week service

Route 1C
- Southside Plaza - Chippenham Mall circulator
- No longer one-seat ride to Downtown
- Hourly service, seven day a week service
Option 2

Corridor D Route
- 15-minute service daytime and evening between Downtown – Chesterfield Towne Center during weekdays and Saturdays
- 30-minute frequencies for full corridor during Sunday service

Route 1 North
- Chamberlayne/Wilmer – Downtown
- Maintain current service levels
- 15-minute peak/midday service
- 30-minute evening and Sunday service

Route 1B
- Southside Plaza – Chippenham Hospital circulator
- No longer one-seat ride to Downtown
- Hourly service, seven day a week service

Route 1C
- Southside Plaza - Chippenham Mall circulator
- No longer one-seat ride to Downtown
- Hourly service, seven day a week service

### Corridor Ridership Potential:
1,500 – 2,500 daily passengers*

*Ridership Potential is inclusive of existing corridor ridership
Corridor H: Route 1 North
**Existing**

**Route 1A**
- Chamberlayne/Wilmer – Spring Rock Green
- 30-minute daytime service, hourly service in evenings
- Hourly Sunday service

**Route 1B**
- Chamberlayne/Wilmer – Warwick
- Hourly daytime service during weekdays and Saturdays
- No evening/Sunday service

**Route 1C**
- Chamberlayne/Wilmer - Chippenham Mall
- Hourly service, seven days a week

**Trunk (north of Southside Plaza)**
- 15-minute daytime service from Southside Plaza to Chamberlayne/Wilmer
- 30-minute evening and Sunday service
Option 1

Corridor H Route
- 15-minute service daytime and evening between Downtown – Chamberlayne/Wilmer during weekdays and Saturdays
- 30-minute service daytime and evening between Chamberlayne/Wilmer – Parham during weekdays and Saturdays (every other bus) and on Sunday
- 30-minute frequencies for full corridor during Sunday service

Route 1A
- Downtown – Spring Rock Green
- 30-minute daytime service, hourly service in evenings
- Hourly Sunday service

Route 1B
- Downtown – Warwick
- Hourly daytime service during weekdays and Saturdays
- No evening/Sunday service

Route 1C
- Downtown – Chippenham Mall
- Hourly service, seven days a week

Trunk (north of Southside Plaza)
- 15-minute daytime service from Southside Plaza to Downtown
- 30-minute evening and Sunday service
Option 2

Corridor H Route
- 15-minute service daytime and evening during weekdays and Saturdays
- 30-minute frequencies during Sunday service

Route 1A
- Downtown – Spring Rock Green
- 30-minute daytime service, hourly service in evenings
- Hourly Sunday service

Route 1B
- Downtown – Warwick
- Hourly daytime service during weekdays and Saturdays
- No evening/Sunday service

Route 1C
- Downtown – Chippenham Mall
- Hourly service, seven days a week

Trunk (north of Southside Plaza)
- 15-minute daytime service from Southside Plaza to Downtown
- 30-minute evening and Sunday service

Implementation
Steps to Consider
Implementation Activities

- Secure Funding
  - Planning/design funds
  - Capital funds
  - O&M funds

- Corridor Planning
  - Identification of bus stop locations
  - Prioritization of sidewalk and intersection improvements
  - Identification of technology improvements
  - Refinement of service schedule
  - Coordination of service between proposed corridors and existing routes

- Procure Vehicles
- Design and Construct Improvements

Improvements throughout corridor will need to be coordinated across jurisdictions
Federal Funding Sources

- Federal
  - Regional Surface Transportation Block Grant (RSTBG) Program
  - Congestion Mitigation and Air Quality (CMAQ) Improvement Program
  - Better Utilizing Investments to Leverage Development (BUILD)
  - Transportation Alternatives (TA) Set-Aside
  - FTA 5303 Metropolitan Planning
State & Local Funding Sources

- **State**
  - SMART SCALE
  - DRPT Capital Assistance
  - DRPT Operating Assistance
  - DRPT Demonstration Project Assistance
  - DRPT Technical Assistance Program
  - Funding formula changes under Omnibus Bill (*pending legislation*)

- **Local**
  - Transportation Service Districts
  - Proffers
  - Local General Funds
  - Central Virginia Transportation Authority (*pending legislation*)
Next Steps
Next Steps

- Brief RRTPO Technical Advisory Committee and Policy Board and GRTC Board
- Summarize cost options, corridor benefits, funding sources, and near-term implementation recommendations in Tech Memo #2
- Distribute Tech Memo #2 to Steering Committee for review
- Finalize report documenting near-term implementation recommendations
